DRONE AS THE FIRST RESPONDER (DFR)

Skydio X10 Drone

Quicker Response Times

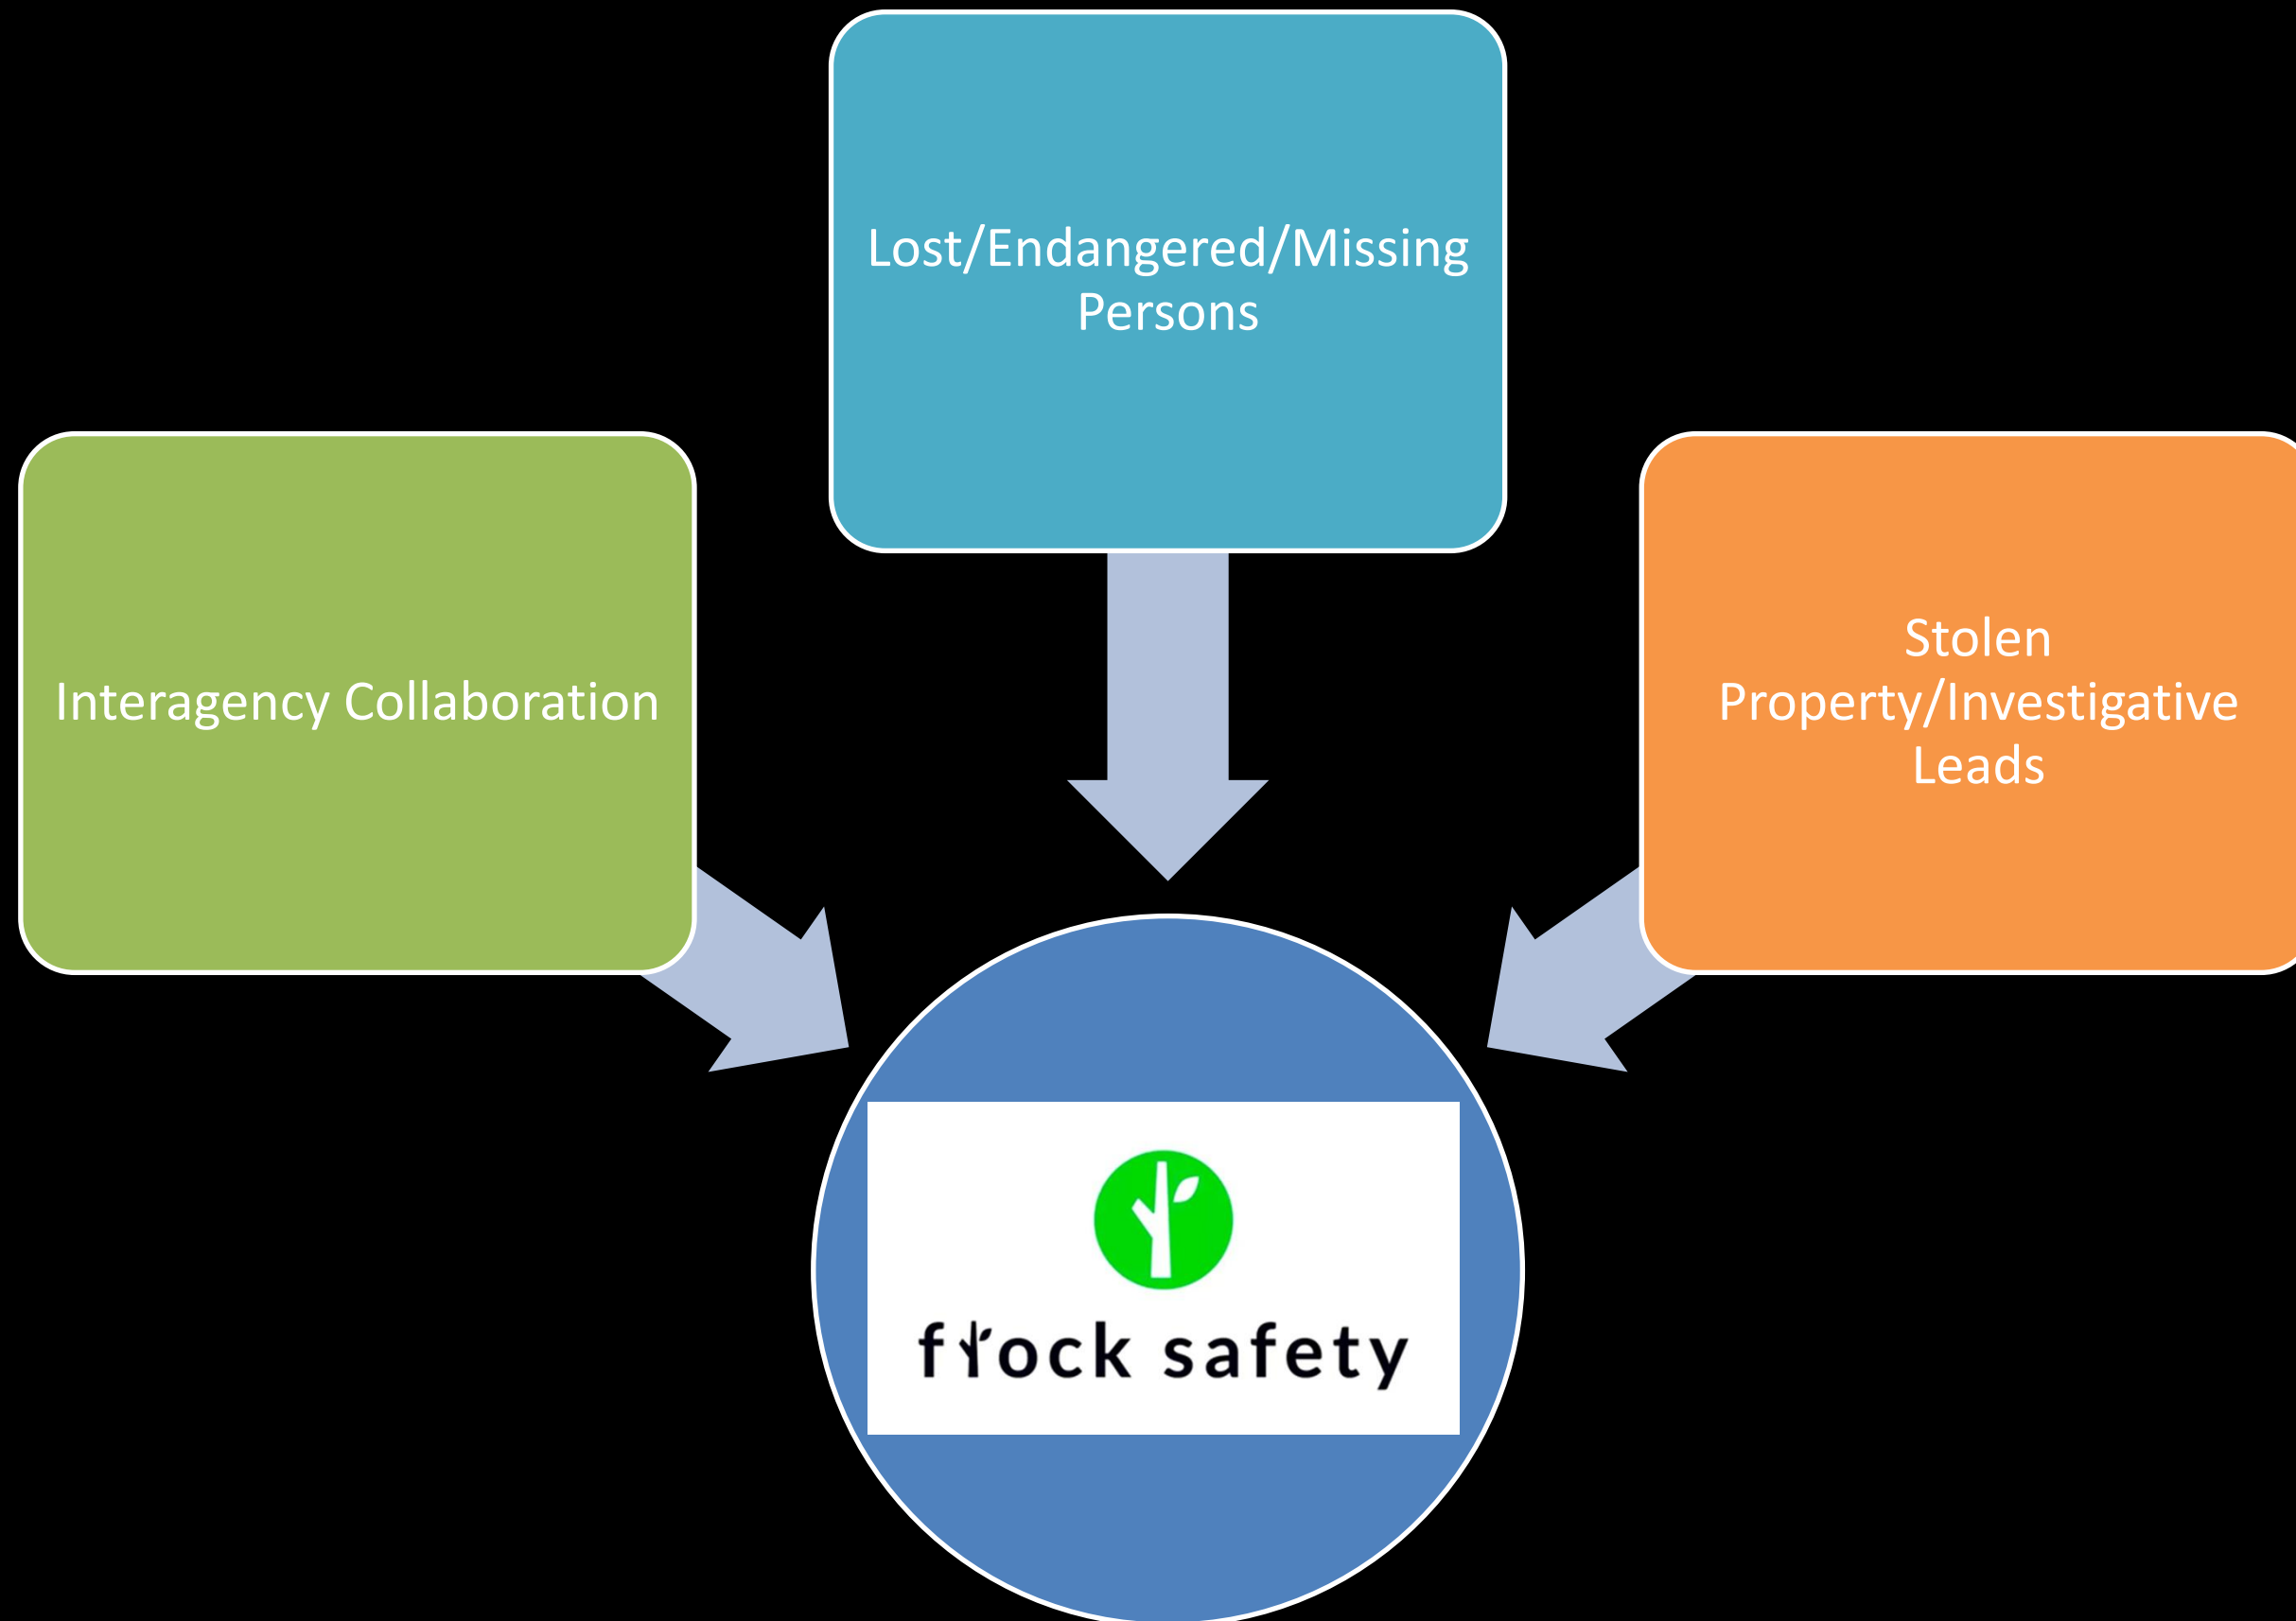

Drone as a First Responder (DFR) is a public safety program in which unmanned aerial systems (drones) are dispatched immediately to emergency calls, often arriving on scene before ground units, to provide real-time aerial intelligence that improves situational awareness, decision-making, response effectiveness, and enhances public safety.

Enhanced Public & Officer Safety

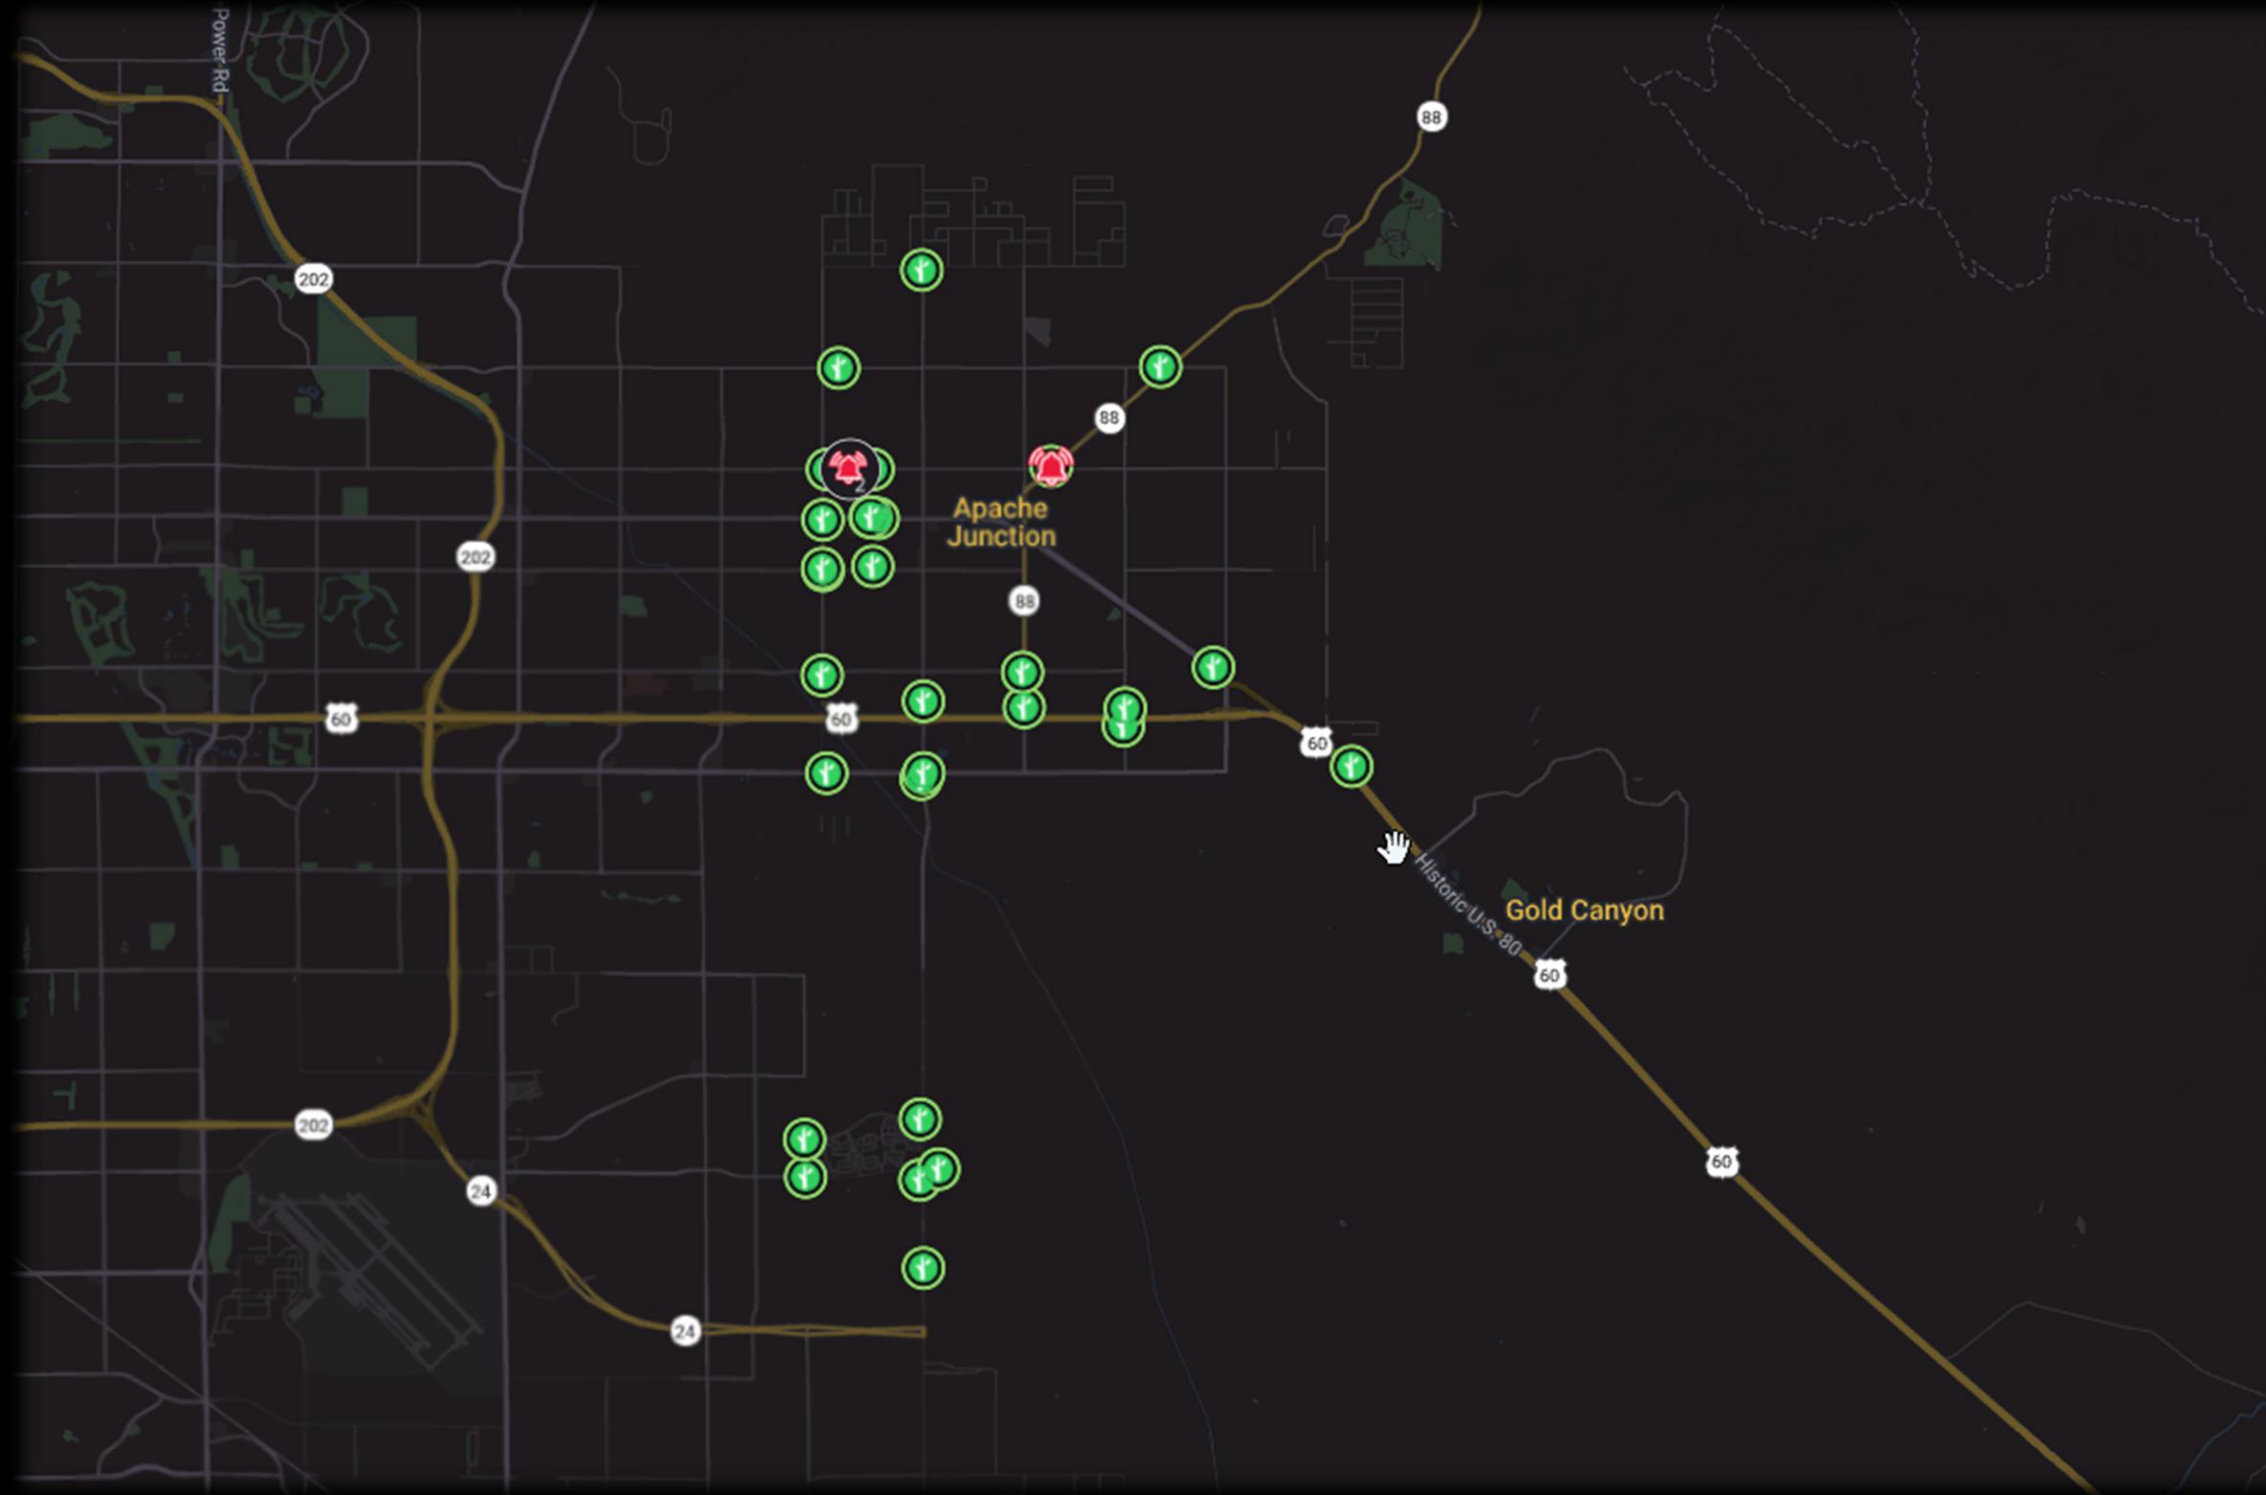

Real Time Intelligence = Improved decision making
