Councilmember Cross moved, seconded by Councilmember Soller that the application for a new Series 12 Restaurant Liquor License for Maggie's Lounge located at 100 N. Plaza Drive be recommended for Approval to the Arizona Department of Liquor Licenses and Control.

Yes: 7 - Mayor Wilson, Vice Mayor Schroeder, Councilmember Nesser, Councilmember Heck, Councilmember Johnson, Councilmember Cross and Councilmember Soller

No: 0

City Clerk Jennifer Pena stated the city received an application for a new Series 12 Restaurant Liquor License for Maggie's Lounge located at 100 N. Plaza Drive, on June 3, 2024, and the Notice of Posting was placed at the establishment on June 4, 2024.

The posting requirement has been met with no comments from the public. Correspondence related to inspections of the premises for safety and code compliant matters have been received from the Apache Junction Police Department, Planning and Zoning Department, Building and Safety Division and the Superstition Fire and Medical District. All four entities find compliance with the inspection requirements and recommend approval.

Development Services added that this applicant has a current building permit in process for tenant improvements to convert a previous health food store into a restaurant. The property is zoned B-3, which allows restaurants and bars outright. The liquor license application can go through the process, but until the business is complete with the renovation and an approved inspection and Certificate of Occupancy have been granted, no business will be allowed at the location.

Mayor Wilson opened the public hearing, receiving no comments, he closed the public hearing.

I. OLD BUSINESS

J. NEW BUSINESS

12. [24-511](#) Presentation and discussion on procurement of a records management system, Laserfiche, from ICC Community Development Solutions utilizing OMNIA cooperative contract #01-158, in an amount of \$56,756.00.

Information Technology Director Doug Wirthgen presented a document management system centralizes and secures content, improves collaboration and supports compliance. Laserfiche Workflow is a business process automation tool. It is built into Laserfiche so an organization can use automatic document classification, organizing, routing, and archiving. Laserfiche uses a computer system and software to store, manage and track electronic documents and electronic images of paper-based information captured using a document scanner.

The City of Apache Junction agrees with ICC Community Development Solutions and to the License Agreements for the software Laserfiche Self Hosted Subscription site license introduces a straightforward software license that includes a wide variety of features to benefit all departments of the municipality. As staff becomes more familiar, automation can be added, as well as integration with 3rd party applications and more.

The cost of this comprehensive project is \$56,756, which will be paid for using FY24 CIP council approved general funds that have been carried forward to council approved FY25 CIP.

Councilmember concerns included: feedback from other cities using this system, compatability with Microsoft, contract period, what is included in the subscription fee and how the system works.

Mr. Wirthgen responded to all concerns.

13. [24-520](#) Presentation and discussion on proposed agreement between the City of Apache Junction and Safeware, Inc. for the purchase of a Mobile Command Vehicle using American Rescue Plan Act (ARPA) funds in the amount of \$1,787,302.16.

Police Chief Michael Pooley presented the Apache Junction Police Department has formally asked to use funds from the American Rescue Plan Act ("ARPA") to purchase a Mobile Command Vehicle (MCV). The city auditor has approved the request to use ARPA funds to acquire the MCV, which costs \$1,787,302.16. This new MCV will replace the current one that is over 20 years old.

Below are several key advantages offered by the MCV:

1. Enhanced coordination and communication with internal and external law enforcement partners
2. On-site emergency incident management

3. Advanced technology and equipment made available at any location necessary
4. Mobile crime labs and evidence processing
5. Rapid deployment and flexibility to urban and remote areas
6. Mobile incident command post
7. Support for Search and Rescue Operations
8. Public Relations and Media Management

The primary role of a MCV is to help during active public safety emergencies and operations, such as major criminal investigations, natural disasters, special events, and rescue operations. MCV's serve as pivotal assets in bolstering emergency response capabilities, facilitating enhanced communication, and enabling efficient incident management. Their mobility and advanced technology render them indispensable tools for public safety agencies. The purchase of this specialty vehicle will allow the Apache Junction Police Department to continue to be in line with other law enforcement agencies across the country.

Councilmember concerns included: benefits of the mobile unit, conditions of the funding being used, when the vehicle will be available and where it is being assembled.

Chief Pooley responded to all concerns.

14. [24-522](#) Presentation and discussion on award of contract to Veregy for sports field lighting retrofit projects within city parks in an amount not to exceed \$1,784,427.75 which includes a 5% contingency.

Parks and Recreation Director Liz Langenbach presented the sports field and arena lighting within City of AJ Parks and Rec facilities are among some of the oldest infrastructure in our parks. Last year, Prospector Park softball fields #1 & #2 were retrofitted. This year budget amounts have been set aside to complete the softball complex by retrofitting fields #3 & #4.

City staff has selected Musco Lighting. They are one of the premier manufacturers for sports field lighting, with a focus on energy-efficient, shielded LED lighting. There are several reasons why this is the best choice for the facilities:

1. This is the same system that is at the Little League fields and Prospector Park fields #1 & #2; and their automated system is already integrated into the facility reservation software and additionally allows light activation by staff from a mobile device or a computer.
2. Musco has experience designing systems that are compliant with Dark Sky Friendly Sports Field Lighting, and the City's application with their design has already been approved by DarkSky International.
3. Over time, the city will have substantial savings through lower electrical costs and lower maintenance/replacement costs.

This project was approved in the FY25 budget for fields #3 & #4. However, staff has also identified potential grants to complete the remaining sports fields at Prospector Park and Superstition Shadows Park, utilizing the budgeted funds as a match. For this reason, staff has included a clause in the contract that allows the city to lock in pricing for the additional projects if

the necessary additional grant funding is received.

The City will utilize Musco's vendor, Veregy, for this replacement project under the 1Government Procurement Alliance (1GPA) Cooperative Contract 22-11PV-08, thus fulfilling procurement and open market procedures.

Staff is recommending a construction contract be awarded to Veregy, in an amount not to exceed \$1,784,427.75, which includes a 5% owner-controlled contingency for unforeseen

circumstances. If the city does not receive the additional grant funding, then only fields #3 & #4 will be completed this year.

Councilmember concerns included: other funding that can be used and how the funding process works.

Ms. Langenbach responded to all concerns.
