Re: Proposed Silveray at Goldfield Major General Plan Amendment

Dear Kelsey:

The Pinal County Development Services Department is aware of the proposed multi-family development proposed within the area of the Pinal County Comprehensive Plan. County staff has prepared comments regarding this proposal and would not offer our support of this recommendation.

Staff finds the request to convert the 18-acre subject site may detract from prime commercial parcels South of US-60. The location of these parcels having access to an arterial roadway and a major highway offer potential for higher levels of traffic consistent with retail requirements and exceeding the trip generation typical of a multi-family development. The presence of such roadways may encourage the market area of potential commercial opportunities to support communities that are more distant and may attract revenue to Apache Junction.

Proximity of existing residential uses to the site promotes a pedestrian scaled commercial development that may support existing residential development on both the West and East sides of the proposed development. Such commercial parcels would also support expansion of additional multi-family projects to the South, which are supported at present by the Pinal County Comprehensive Plan. Development of this multi-family project to the south of the General Commercial land-use designated parcels would be consistent with the High Density Residential land-use designation present within the Pinal County Comprehensive Plan. Staff would be amicable toward multi-family development south of the proposal area provided commercial designations remain that would support residential growth.

Please feel free to contact me regarding staff comments and our position on this matter. Staff appreciates the opportunity to provide input regarding this case.

Sincerely,

Patrick Roberts
