Affiliations/Memberships

- American Society of Civil Engineers 1984 - present
- American Public Works Association 2005 -2013
- Solid Waste Association of America 1990 - 2002

Experience

- John has over thirty years of experience in municipal engineering and management, including:
 - Having spent most of his career working for the City of Fresno with over 500,000 population, he navigates easily from the details of development projects, to the inner workings of the city manager's office where he rose to deputy city manager. John excels and can bring together divergent viewpoints together by collaborating to find a workable solution. He is a natural consensus builder while bringing to the table years of managing, engineering and public works experience.

Experience continued

- Extensive capital improvement project management experience including wastewater treatment plants; ground water wells and reservoirs; sewer & water infrastructure; street improvements, as well as airport improvements to runways, taxiways and terminal
- Created an environmental resource unit with direct responsibility for management of State and Federal Superfund sites; including interaction with State and Federal leadership on financial liability and site management issues.
- During most recent interim assignment, developed, organized and managed Florence's newly created Utilities Department.
- Handled a concurrent temporary position as Public Works Director - successfully completed a backlog of capital projects including: two major waterlines; drilling of a new municipal water well; refurbished two wastewater treatment plants; initiated a WIFA funded expansion design for the primary WWTP; installed multiple fire hydrants; constructed a temporary roadway to serve a newly constructed municipal center; added a new parking shade structure and pavement improvements to the Police Department; and, completed numerous improvements to existing municipal buildings.
- Experience overseeing all aspects of county engineering including traffic, capital improvement planning, inner-departmental coordination, and development related issues.
- Extensive experience working in large organizations and developing policies and procedures that produce reliable budgets, outcomes and products.
- Familiar with all aspects of municipal engineering and public works operations from sanitation, utilities, development review, building regulations, capital improvement project management, environmental services, etc.

Consensus builder and adept manager of personnel.
