Subject: Intergovernmental Agreement with ADOT for street sweeper

In late 2018 the city was awarded a replacement street sweeper through a Congestion Mitigation Air Quality ("CMAQ") grant. Two options were given for the street sweeper's procurement; first option being to self-administer a federally funded solicitation, or a second option consisting of using a front-end collaborative contract with ADOT who would take on many of the federally funded project requirements. City staff has chosen option two recognizing the both advantages of the economy of scale that comes with an ADOT solicitation and their experience in the administration of federal funds.

City staff would like to give the opportunity to council to discuss this IGA planned for a quick turnaround for approval by resolution the following night to keep to the timeline ADOT is planning for the procurement.
