

Only a suggestion, we are good either way. However, if we removed this area from Dog Park Area #2 it would reduce some potential conflicts or maintenance aspects for the low flow swale, it would also eliminate grates on both ends of the new pipe, and eliminate one concrete spillway/fence interface.

The downside is that it would reduce the total Dog Park Area #2 to approximately 0.26 Acres. It would not change the size of the turf area.

Approximately 0.13 Acres or 5,840 Square Feet

APACHE JUNCTION DOG PARK AT PINAL COUNTY BASIN

Preliminary Concept Plan

scale: 1"=20'
0' 10' 20' 40' north

Date: 02.25.2020
