SECTION B-2: Problem Identification

Provide a narrative of the highway safety problem in your community/jurisdiction. Describe the nature and magnitude of the problem using valid, up-to-date statistical data. Identify which program area(s) have the greatest need, (i.e., impaired driving, occupant protection, speeding and aggressive driving, pedestrian safety, etc.). Indicate what is happening, when it is happening, where it is happening, and the contributing factors.

The City of Apache Junction is a small suburban community just east of the Phoenix Metropolitan area. The city has an estimated population of over 42,000 with an additional 20,000-30,000 seasonal residents. Apache Junction's north and eastern sectors have many dirt roadways where residents have a desire for no light pollution. This rural environment exacerbates conditions for unsafe driving while providing the illusion to impaired drivers the area is free of enforcement. There are 186 paved road miles within the city limits and 18 signalized intersections operated and maintained by the city. In addition, there are approximately 4.5 miles of US60 and 5.5 miles of SR88 within the city limits.

Within the past three years, the Ironwood Corridor has required much manpower to address the vehicle collisions and complaints. In 2017, the city had 78,060 vehicles going through the intersection of Baseline and Ironwood Drive. In 2020, there were 94,788. The increase of 16,728 vehicles was in this one intersection. Another busy intersection is Ironwood Drive and Apache Trail. In 2017, there were 42,797 vehicles and in 2020, 72,652 vehicles an increase of 29,855 for this intersection. The city is on the threshold of development for the land south of Baseline, an additional 6,700 to 8,000 acres. With this land, there will be additional streets with traffic which will further increase traffic problems.

Our DUI arrest(s) demonstrate our success in combating drivers who continue to choose to drive while impaired. These arrest would not be possible without the funding through the Governor's Office of Highway Safety. Enforcement will take place in problematic areas including Ironwood Corridor with Apache Junction going south into San Tan Valley, and routes leading to and from major Arizona recreational areas during specific holiday periods in and around Apache Junction. The new refrigerator evidence storage for the DUI blood samples will allow AJPD to keep the blood in proper settings for scientific evaluation and prosecution necessary in combating impaired drivers.

SECTION C: Goals and Objectives – IMPAIRED DRIVING

Based on your problem identification stated in Section B-2, fill in the blanks for each agency Goal and Contract Objective outlined below.

Agency Goals:

To decrease the number of impaired driving-related crashes 12 % from 25 in calendar year 2020 to 22 by December 31, 2022.

To decrease the number of serious injuries in impaired driving-related crashes 14 % from 7 in calendar year 2020 to 6 by December 31, 2022.

To decrease the number of fatalities in impaired driving-related crashes 100 % from 2 in calendar year 2020 to 0 by December 31, 2022.

Contract Objectives:

To participate in a minimum of 3 DUI saturation patrols per quarter during FFY 2022.

To participate in a minimum of 1 DUI task force operations per quarter during FFY 2022.

Additional Contract Objectives:

In addition to the required goals and objectives, create two additional contract objectives that your agency can achieve by the end of FFY 2022.

1. This vehicle will be utilized in 100% of DUI Enforcement Operations in FFY2022.
2. This vehicle will be utilized in deploying smart signs strategically in combating impaired driver to educate roadway users 20% of it's vehicle deployment.
